NEUCE NEUCEPOX V620 - Epoxy Varnish Code: 29.26 O FUTURO DA TINTA SECTION 7 : HANDLING AND STORAGE PRECAUTIONS FOR SAFE HANDLING: 7.1 # Comply with the existing legislation on health and safety at work. General recommendations: # Avoid any type of leakage or escape. Keep the container tightly closed. Recommendations for the prevention of fire and explosion risks: # Due to its flammability, this material should only be used in areas from which all naked lights and other sources of ignition have been excluded and away from other heat or electrical sources. Switch mobile phones off and do not smoke. No tools with a potential for sparks should be used. Flash point 25* # °C Autoignition temperature 444* # °C # Upper/lower flammability or explosive limits 1.1* - 7.5* % Volume 25°C # Recommendations for the prevention of toxicological risks: # Do not eat, drink or smoke while handling. After handling, wash hands with soap and water. For exposure controls and personal protection measures, see section 8. Recommendations for the prevention of environmental contamination : # Avoid any spillage in the environment. Pay special attention to the cleaning water. In the case of accidental spillage, follow the instructions indicated in section 6. CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES: 7.2 * Forbid the entry to unauthorized persons. Keep out of reach of children. This product should be stored isolated from heat and electrical sources. Do not smoke in storage area. If possible, avoid direct contact with sunlight. Avoid extreme humidity conditions. In order to avoid leakages, the containers, after use, should be closed carefully and placed in a vertical position. For more information, see section 10. # According to current legislation. Class of storage Maximum storage period # 24. months ÷ # min: 5. °C, max: 35. °C (recommended). Temperature interval 2 Incompatible materials: # Keep away from oxidixing agents, from strongly alkaline and strongly acid materials. Type of packaging: # According to current legislation. Limit guantity (Seveso III): # Directive 2012/18/EU: - Named dangerous substances/mixtures: None - Hazard categories and lower-/upperthreshold quantities in tonnes (t): Physical hazards: Flammable liquid and vapour (P5c) (5000t/50000t). Health hazards: Not applicable Environmental hazards: Not applicable Other hazards: Not applicable. - Threshold quantity for the application of lower-tier requirements: 5000 tons - Threshold quantity for the application of upper-tier requirements: 50000 tons - Remarks: The qualifying quantities set out above relate to each establishment. The quantities to be considered for the application of the relevant Articles are the maximum quantities which are present or are likely to be present at any one time. Dangerous substances present at an establishment only in quantities equal to or less than 2 % of the relevant qualifying quantity shall be ignored for the purposes of calculating the total quantity present, if their location within an establishment is such that it cannot act as an initiator of a major accident elsewhere at that establishment. For more details, see note 4 of Annex I of the Seveso Directive

For the use of this product particular recommendations apart from that already indicated are not available.

SECTION 8 : EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 CONTROL PARAMETERS:

If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assesing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.

OCCUPATIONAL EXPOSURE LIMIT VALUES (TLV)

AGCIH 2019	Year	TLV-TWA		TLV-STEL		Remarks
241.2	1000	ppm	mg/m3	ppm	mg/m3	S
Xylene	1996	100.	434.	150.	651.	A4, BEI
Hydrocarbons C9 aromatics		50.	290.	2.5	T.CO.	Recommended
Isobutylmethylketone	1981	50.	205.	75.	307.	BEI
Ethylbenzene	2002	100.	434.	125.	543.	A3, BEI
n-butyl acetate	2015	50.	237.	150.	713.	
1-methoxy-2-propanol	1976	100.	369.	150.	553.	

TLV - Threshold Limit Value, TWA - Time Weighted Average, STEL - Short Term Exposure Limit.

A3 - Carcinogenic in animals.

A4 - Non classified as carcinogenic in humans.

BEI - Biological exposure index (biological monitoring).

BIOLOGICAL LIMIT VALUES:

Biological monitoring can be a very useful complementary technique to air monitoring when air sampling techniques alone may not give a reliable indication of exposure. Biological monitoring is the measurement and assessment of hazardous substances or their metabolites in tissues, secretions, excreta or expired air, or any combination of the se, in exposed workers. Measurements reflect absorption of a substance by all routes. Biological monitoring may be particularly useful in circumstances where there is likely to be significant skin absorption and/or gastrointestinal tract uptake following ingestion, where control of exposure depends on respiratory protective equipment, where there is a reasonably well-defined relationship between biological monitoring and effect, or where it gives information on accumulated dose and target organ body burden which is related to toxicity.

This preparation contains the following substances that have established a biological limit value:

 <u>a</u> Xylenes (technical or commercial grade) (2011): Biological determinant: methylhippunc acids in urine, BEI: 1.5 g/g creatinine, Sampling time: end of shift (2).

Methyl isobutyl ketone (2009): Biological determinant: methyl isobutyl ketone in urine, BEI: 1 mg/l, Sampling time: end of shift (2).
 # Ethylbenzene (2013): Biological determinant: sum of mandelic acid and phenylglycolic acid in urine, BEI: 0.15 g/g creatinine Sampling time: end of shift (2), Notation: (Ns).

(2) When the end of the exposition not coincide with the end of the working day, the sample will be taken as soon as possible after the real exposition ceases.

(Ns) Non-specific. The determinant is non-specific, since it is also observed after exposure to other chemicals.

DERIVED NO-EFFECT LEVEL (DNEL):

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH.

Rat > 17400. 15400. Ethylbenzene 3500. Rat Rabbit Rat 10768. 23400. n-butyl acetate Rat 17600. Rabbit > Rat 1-methoxy-2-propanol 4016. Rat 13000. Rabbit > 54600. Rat Estimates of acute toxicity (ATE) ATE ATE ATE mg/m3-4h inhalation for individual ingredients : mg/kg bw oral mg/kg bw cutaneous Xylene (mixture of isomers) 1100.* 11000.* Vapours 11000.* Isobutyimethylketone Vapours Ethylbenzene 17400. Vapours (*) - Point estimates of acute toxicity corresponding to the classification category (see GHS/CLP Table 3.1.2). These values are designed to be used in the calculation of the ATE for classification of a mixture based on its components and do not represent test results. (-) - The components that are assumed to have no acute toxicity at the upper threshold of category 4 for the corresponding exposure route are ignored.

No observed adverse effect level Not available

Lowest observed adverse effect level Not available

INFORMATION ON LIKELY ROUTES OF EXPOSURE: Acute toxicity:

Routes of exposure	Acute toxicity	Cat.	Main effects, acute and/or delayed	Criteria
Inhalation: Not classified	ATE > 2000 0 mg/m3	1	# Not classified as a product with acute toxicity if inhaled (based on available data, the classification criteria are not met).	GHS/CLP 3.1.3.6.
Skin: Not classified	ATE > 2000 mg/kg bw	Ĩ.	# Not classified as a product with acute toxicity in contact with skin (based on available data, the classification criteria are not met).	GHS/CLP 3.1.3.6.
Eves: Not classified	Notavailable	-	Not classified as a product with acute toxicity by eye contact (lack of data).	GHS/CLP 1.2.5.
Ingestion: Not classified	ATE > 2000 mg/kg bw	1	# Not classified as a product with acute toxicity if swallowed (based on available data, the classification criteria are not met).	GHS/CLP 3.1.3.6.

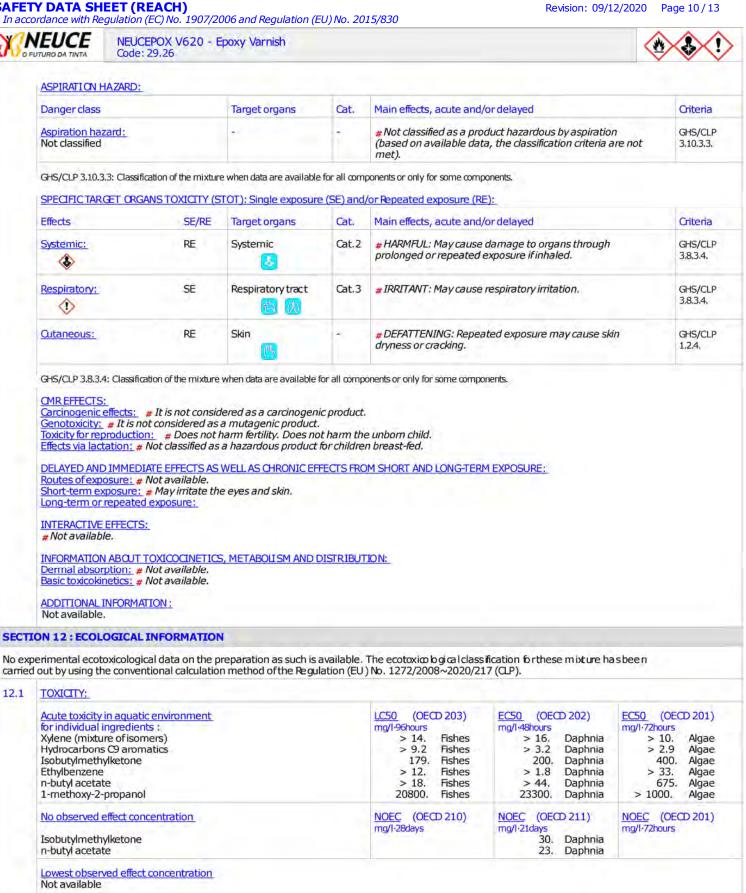

GHS/CLP 3.1.3.6: Classification of mixtures based on ingredients of the mixture (additivity formula).

CORROSION / IRRITATION / SENSITISATION :

Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
Respiratory corrosion/irritation:	Respiratory tract	Cat.3	# IRRITANT: May cause respiratory irritation.	GHS/CLP 1.2.6. 3.8.3.4.
Skin corrosion/irritation:	Skin	Cat.2	# IRRITANT: Causes skin irritation.	GHS/CLP 3.2.3.3.
Serious eye damage/irritation:	Eyes	Cat.2	# IRRITANT: Causes serious eye irritation.	GHS/CLP 3.3.3.3.
Respiratory sensitisation: Not classified	-	*	# Not classified as a product sensitising by inhalation (based on available data, the classification criteria are not met).	GHS/CLP 3.4.3.3.
Skin sensitisation:	Skin	Cat.1	# SENSITISING: May cause an allergic skin reaction.	GHS/CLP 3.4.3.3.

GHS/CLP 3.2.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.3.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.4.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

ЕСТІ	ON 13 : DISP	OSAL CONSIDERATIONS									
3.1	WASTE TREATMENT METHODS: # Directive 2008/98/EC~Regulation (EU) no. 1357/2014: # Take all necessary measures to prevent the production of waste whenever possible. Analyse possible methods for revaluation or recycling. Do not discharge into drains or the environment, dispose at an authorised waste collection point. Waste should be handled and disposed in accordance with current local and national regulations. For exposure controls and personal protection measures, see section 8. Disposal of empty containers: # Directive 94/62/EC~2015/720/EU, Decision 2000/532/EC~2014/955/EU: # Emptied containers and packaging should be disposed in accordance with currently local and national regulations. The classification of packaging as hazardous waste will depend on the degree of empting of the same, being the holder of the residue responsible for their classification, in accordance with Chapter 15 01 of Decision 2000/532/EC, and forwarding to the appropriate final destination. With contaminated containers and packaging, adopt the same measures as for the product in itself.										
	Procedures for neutralising or destroying the product: # Controlled incineration in special facilities for chemical waste, in accordance with local regulations.

15.1	EU SAFETY, HEALTH AND ENVIRONMENTAL REGULATIONS/LEGISLATION SPECIFIC: The regulations applicable to this product generally are listed throughout this Safety Data Sheet. Restrictions on manufacture, placing on market and use: See section 1.2		
	Tactile warning of danger: Not applicable (product for professional or industrial use).		
	Child safety protection: Not applicable (the classification criteria are not met).		
	VOC information on the label: # Contains VOC max. 500. g/l - The limit value 2004/42/CE-IIA cat. j) for the product ready for use is VOC max. 500. g/l (2010).		
	OTHER REGULATIONS:		
	Responsabilidade ambiental: A utilização deste produto em Portugal fica sujeita ao regime de responsabilidade ambiental previsto no DL, 147/2008.		
	Control of the risks inherent in major accidents (Seveso III): See section 7.2		
	Other local legislations: # The receiver should verify the possible existence of local regulations applicable to the chemical.		
15.2	CHEMICAL SAFETY ASSESSMENT: # A chemical safety assessment has not been carried out for this mixture.		

In accordance with Regulation (EC) No. 1907/2006 and Regulation (EU) No. 2015/830

The information of this Safety Data Sheet, is based on the present state of knowledge and on current UE and national laws, as the users' working conditions are beyond our knowledge and control. The product is not to be used for other purposes than those specified, without first obtaining written handling instruction. It is always the responsibility of the user to take all necessary steps in order to fulfil the demand laid down in the local rules and legislation. The information in this Safety Data Sheet is meant as a description of the safety requirements of the product and it is not to be considered as a guarantee of the product's properties.
